
Training dynamics — 4x60 tanh, hard IC, 3000 LHS points, 9 windows, causal
(a) Total loss convergence
per-iteration loss
rolling geometric mean
$\mathcal{L}$
iteration
(b) Loss decomposition (hard IC: no penalty term)
loss term
epoch
(c) Learning-rate schedule
1e−3
learning rate
epoch
(d) Logged loss vs reference error (coverage may grow)
error
MSE vs reference on trained prefix
training loss
epoch
